Q3 (M=20, z=1.0) Ratio W_k/W_{k+1} Correlation
Pearson $r = 0.955$ ($p < 10^{-6}$)
Spearman $\rho = 0.606$
$R^2 = 0.912$
Slope: +16.05% / unit ratio
Linear Fit (r = 0.95)
Mean per Rank k (z=1.0)
Stream Ingestion Saved (%)
Weight Ratio $R_W = W_k/W_{k+1}$ (Normal Scale)
Q3 (M=20, z=2.0) Ratio W_k/W_{k+1} Correlation
Pearson $r = 0.955$ ($p < 10^{-6}$)
Spearman $\rho = 0.773$
$R^2 = 0.912$
Slope: +5.99% / unit ratio
Linear Fit (r = 0.95)
Mean per Rank k (z=2.0)
Weight Ratio $R_W = W_k/W_{k+1}$ (Normal Scale)
